

SETTLING will provide students with their first accommodation on the Gold Coast as well as personalised assistance and support through adaptation stage. Students will learn the first stages of settling in for studies and travel purposes whilst in Australia. These young travellers will improve their life experience and take unforgettable memories to any country they may experience afterwards.

Students will be independent and responsible enough to care for their new home environment, they will have the freedom of coming and going out of the house whenever they want.

Students will have the opportunity to participate in activities around the Gold Coast and Brisbane whenever they wish. The flatmate/s will most likely make sure the students enjoy the experience and the house during their stay.

The location of the houses is close to public transport and easy access to schools and most popular sites on the Gold Coast. The stay with **SETTLING** is minimum 4 weeks (conditions apply).
