Total cost advised prior to Repairs

Sewer repair can be a big investment. That's why we will use our "state of the art" CCTV Camera to show you what is obstructing your sewer. We will help you deal with your sewer emergency promptly & effectively. A timely solution to your sewer problem is important to us and we will advise you of the cost of the job before we start!

WHO IS RESPONSIBLE FOR COSTS?

While some causes of sewerage backups are common in city and suburban main sewer lines and are under the council's responsibility, there are other causes as well.

The sewer lines from the street to the dwelling on the property as well as any lines between buildings and the main line are usually the property owner's liability/responsibility.

The use of a CCTV Camera system investigation will locate the problem to determine who's responsible for the costs.

STORM WATER – Drainage

No matter what the drainage problem is, Pipe & Drain Tech has the solution!
