

REGUPOL® IT JUST FEELS RIGHT

RUBBER FLOORING COLLECTION

everroll®

Regupol®

Regupol
Australia

You crave colour
while creating
interiors with
sustainability in
mind. You seek
vibrancy yet
demand durability.

**Can one product
collection possibly
deliver all this and
more?**

Presenting everroll® from Regupol.

Here is a collection of flooring products that satisfies the rudimentary concerns of function and form. Such attributes are not unexpected when you consider their German origins. At the same time, they deliver on sustainability, incorporating high quality post-consumer and pre-consumer materials. This helps open the door to green building design briefs which may be out of reach to lesser products.

everroll® offers seven distinctive product ranges, infused with fragments of colour which harmonise with other flooring systems and contemporary furnishings. All **everroll®** products are homogeneous, have no wear layer and are PVC free.

edition 4.0 brings a new high definition surface to our Core, Tone and Vitality Ranges. edition 4.0 reproduces floor colours in their full intensity under almost any lighting conditions whilst minimising gloss reflectance.

Pre-Seal with Reguseal utilises the same advanced polymer sealing technology of Reguseal, but pre-sealed from the factory. Saving you time and effort during installation.

Please Note: All images contained in this brochure are for illustration purposes only. Please request a product sample from your Regupol Team Member before making a decision. The everroll® collection of rubber flooring is made from recycled materials, variations in the shading, EPDM and colour chip dispersion is normal.

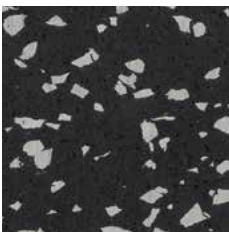

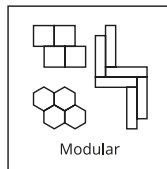

CORE RANGE

IT'S THE ORIGINAL AND MOST SUCCESSFUL EVERROLL® PRODUCT; THE CORE OF OUR COLLECTION. **EVERROLL® CORE** IS LIVING PROOF THAT GOOD DESIGN NEVER GOES OUT OF FASHION.

COMPOSITE FLOORING

THERE ARE TIMES WHEN DESIGN MUST TAKE A BACK SEAT TO COMFORT. IN SUCH INSTANCES, **EVERROLL® COMPOSITE FLOORING** IS AN ELEMENTARY CHOICE.

COMPOSITE FLOORING

Durability and comfort are the result of a synthesis of composite layers. The upper wear layer is supported by a shock-absorbent **Regupol® Shockpad Underlay**, combining durability with added resilience.

Whilst there are two layers, the benefits are felt on many levels. On one hand, the safety of shock absorbency which is vital for growing bodies. On another level, it provides acoustic dampening of foot fall and impact noise while at play. With it's high levels of comfort and resilience, **everroll® Composite Flooring** has the ability to remain permanently elastic for many years.

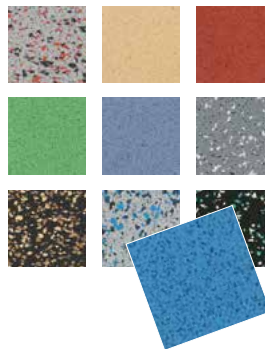

everroll® Composite Floor

Product Data

Thickness	5mm Shockpad + 4mm everroll® (9mm)
	8mm Shockpad + 4mm everroll® (12mm)
	10mm Shockpad + 4mm everroll® (14mm)
	15mm Shockpad + 8mm everroll® (23mm)
Roll Width	1.25m

Build your own

1. Select a colour from any everroll® range.

2. Select a Shockpad Underlay to suite your preferred level of impact resistance.

Composite Flooring is available using all everroll® Rubber Flooring colours.

ACCESSORIES

Regupol Adhesives

Regupol offer an extensive range of adhesives, sealers and primers to suit a broad range of applications within the flooring industry. All of the products available are tested, proven and warranted with the Regupol® and everroll® product ranges.

Made in Australia and VOC compliant for green buildings, the products offer specifiers and installation contractors a warranted flooring system.

Sealing with Reguseal

everroll® has been designed to exact specifications, giving a good balance between comfort and ease of cleaning that you would expect from any floor.

But for some applications, sealing the material is desirable. Utilising advanced polymer sealing technology, our new sealer allows for quicker, easier cleaning. While the addition of an anti-microbial allows for use in more fitness applications.

Refer to the **To Seal or Not to Seal FAQ** available from www.regupol.com.au

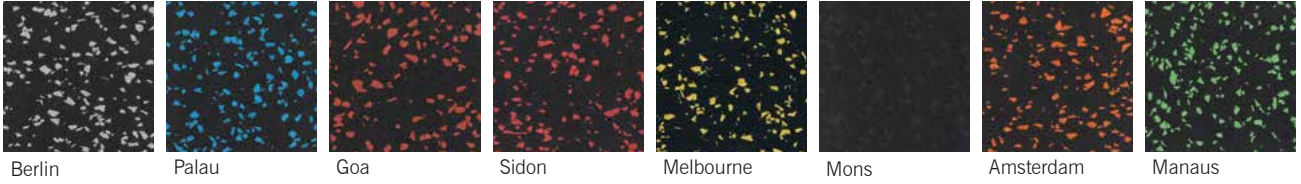

Inlay Design

Imagine if you could install a beautiful rubber floor, with its strength and superior longevity, displayed with your own logo. Our Computer Aided Cutting Machine can do just that and it's only limited by your imagination.

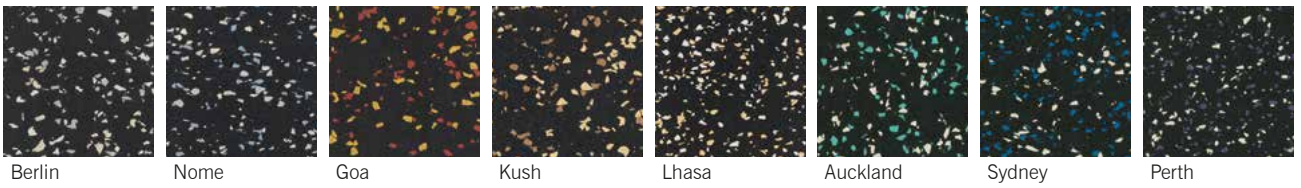

Inlays can be used to create patterns, logos, route markers or lettering. Regupol can even create individually tailored chessboard patterns, geometric designs (rectangles, squares, diamonds, circles, ellipses) and contoured graphics that are suitable for installation by your expert floor fitter.
