

## Make Eagle Masonry your number one choice for paving and blocks.

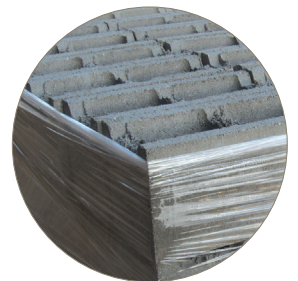

Eagle Masonry is a family owned business with 30 years of experience in manufacturing and supplying concrete masonry products to Australian builders, landscapers and developers for a broad range of projects.

Eagle Masonry uses high quality raw materials combined with modern manufacturing methods to provide you with a consistent range of concrete pavers and blocks.

Eagle Masonry pavers and bullnose are manufactured using a method of dry pressing which gives solid and square pavers and bullnoses which are durable, slip-resistant, and easy to maintain. Our pavers are ideal for large and small building and landscaping projects such as footpaths, courtyards, pool surrounds, driveways and walkways.

Eagle Masonry concrete blocks are manufactured using a combination of hydraulic pressing and vibration creating a dense and strong block. The blocks are ideal for both structural load-bearing and non-load-bearing applications.

Eagle Masonry has experience in advising and supplying residential and commercial projects nationally. For more detail see our range specification sheet.

Pavers & bullnoses available in a range of colours
