

# Engineering Hub

Asset Management Solutions

**Engineering Hub** is a professional engineering consultancy providing economical solutions to enable businesses to successfully establish Asset Management and Maintenance Systems. Effective implementation of these systems ensures optimised availability and reliability of assets. **Engineering Hub** provides the following:

Asset Management Solutions	To develop and/ or improve the businesses procedures relating to management of it's assets to ensure the correct identification and optimisation.
Maintenance Management Solutions	To ensure the asset maintenance strategy and the maintenance execution is efficient.
Stores Management Solutions	To ensure the engineering store is being efficiently managed and controlled.
Contractor Management Solutions	To ensure that contractors are providing services that are: value for money; of the required quality; in a timely and safe manner.
Project Management Solutions	To provide management assistance or resources to ensure that the design, procurement, installation and commissioning of a project provides the required outcomes and meets the business targets.

**Engineering Hub** works in close collaboration with their clients to develop the best business solutions and can provide resources to ensure efficient implementation.

The team have experience, in Australia and overseas, in diverse industries like: beverage container manufacturing; building product manufacturing; recycling industries; alternative waste treatment; odour treatment; bulk grain storage; waste water; mining and hospitality.

The team has a wealth of Asset Management, Operations, Maintenance, Project, Design and Supply experience and is capable of influencing organisations at Senior Management levels, as well as implementing change at shop floor.

With experience in the design of various plant and equipment, **Engineering Hub** can design new facilities and engineering solutions. **Engineering Hub** also has experience in FMEA, RCA, FEA, and risk assessments.

Contact **Engineering Hub** to discuss which Asset Management Solution will benefit your business.
