### HOW OUR CHOCOLATE FOUNTAIN WORKS

The very best Belgian Chocolate is melted then installed into a health-grade-stainless steel fountain which operates electrically. The result is an over-flowing of delicious liquid chocolate cascading over and around the fountain. Skewers are threaded with marshmallows, fruit, pretzels, or whatever you would like to smother in chocolate. Even small shot glasses can be filled with chocolate and served with side plates of fruit or marshmallows. Guests then entertain themselves and eat the chocolate in their own way and to taste. Dark, milk or white chocolate is available and we can customise a colour just for you. Pink chocolate fountains are especially popular at our teen's girl's birthday parties. The chocolate fountain is suitable for both indoor and outdoor events. For outdoor events, the fountain is surrounded with a clear perspex box for protection.
