

Your History

Digital photo restoration

20 years experience

Call to discuss restoring your family photographs

Your History

... provides high end photographic retouching applied to your family archives. Your images are carefully restored and reproduced to original quality, so they can be enjoyed and remembered for generations to come.

20 years retouching experience and expertise in the latest technology allow me to manipulate images with amazing results. Photographs sometimes call out for enhancement or modification by a trained technician, resulting in a superior display.

As every image is unique, so every job has it's own demands. Your 'eye' is the primary consideration, so if your expectations are not met, there is no obligation.

Prices for digitising and manipulation start at \$25. Framing solutions also available.

Call to discuss the possibilities.
