CAPABILITIES STATEMENT

Pipeline Rigging Pty Ltd is an Illawarra based and operated scaffolding and rigging company that has been active in the Illawarra South Coast and Sydney area for 20 years.

Systems available include Layher, Cuplock, Peri, Coates, Quickdeck and propping systems. We have an extensive range of modular steel scaffolding.

We have access to a wide variety of scaffold system suppliers and are able to tailor a project specific design using the most suitable system to give our customers the best available finished product.

All materials are fully serviced and inspected regularly. All scaffolding systems are built to Australian Standards 4576 & 1576.

Our main focus is on continually changing and adapting to improve and stay informed with the Construction Industry.

We supply our own in-house equipment and labour – no subcontractors.

We have access to a wide range of specialist suppliers – we are 100% in control of their product

We have a Fleet of well-maintained vehicles and trucks for conveyance of scaffold material.

Fully trained personnel – Working at Heights, Confined Space, Rail Industry, First Aid, Workcover ticketed

Project Management for large or small ventures
