WHY uPVC?

- » Thermal characteristics are superior to wooden or aluminium analogues
 - » uPVC is so strong and safe that it is commonly used in food and dental industries
 - » Our windows are designed to withstand Australian sun
-
- » uPVC windows have become the top choice in the UK, Europe and America for their low maintenance, durability and 100% recyclability
 - » uPVC material can withstand extreme weather conditions including heat, cold, wind, rain and snow without rusting, rotting, chipping or flaking
 - » Being fire-resistant, the material is commonly used in fire risk areas and does not support burning

WHY Windows Republic?

- » The most competitive offer on the Australian market today
- » All our windows are custom made to your specifications
- » Complete service package - from free measurement to installation
- » High quality materials from top of the range suppliers such as German-made ROTO hardware
- » Lean processes allow us to eliminate overheads and pass on the savings to you
- » All our products have been tested locally to comply with Australian Standards and regulations
