

ALPHATM FORKLIFTS

Big brand performance - without the big brand price

B A O L I
Forklifts

Company Description

Welcome to the World of Baoli. We thank you for your consideration on a fresh approach to forklift warehouse solutions established in 1991. Baoli has been in the business of manufacturing Forklifts, Tow motors and new ideas, using the latest in design features, innovation and international technology.

Baoli prides itself with abundant strength in electronics, and engineering sciences and focuses their strict requirements for perfection along-side the Institute of China Information Ministry, a leading organisation in China, based in Shanghai. This support combined with a joint venture with Sino-USA has ensured the continued success and steady growth of Baoli Forklifts. This gives Baoli an advanced development in the fabrication of motor moulds as well as magnet core punching, for rotor and stator of motors with 8 sets of high speed press machines.

The advantages in the 2500 employees that produce the Baoli machines include over 300 Engineers and Technicians in a factory of over 120,000 square meters. Baoli sales world - wide exceed over USD 72 million. With research and design specialists, the manufacture of Baoli forklifts utilises the very best and latest of technology including Mitsubishi petrol motors and ISUZU diesel engines.

Baoli produces the 1.5 - 7 Ton Forklifts with all the available attachments by Cascade (www.cascorp.com.au) from the United States. Baoli exceeds expectations and is in compliance with the ISO (International Standard Organisation).

Using a Baoli Forklift for all your warehousing needs will make the movement, transport, delivery of your product and the safety of your staff an efficient and cost-effective addition to your business.

Forklift truck with driver's cab

| Special Vehicle

The CJ broad out look door frame gives the driver a better view overall. The console features a small soft steering wheel with electric liquid steering operation for total control.

The Baoli range of forklift trucks have been designed ergonomically with the driver in mind. The total operation space within the cab has been enlarged to keep the driver from feeling tired.

The Baoli cross oil steering bridge gives the steering system a more flexible and reliable method of steering. It will also decrease the overall vibration of the forklift in operation.

The solid overhead frame will ensure the safety of the driver from anything that may fall from above. We have also added a two way air filter to prevent the driver from inhaling dust and will also prolong the life of the generator.

The driving power device consists of the most advanced technology. We use the highest quality parts and have also incorporated the world leader (GE) in imported generators.

The quality built engine's gives the Baoli brand of Forklift the most power for any type of usage. With research and design specialists, the manufacture of Baoli forklifts utilises the very best and latest of technology including Mitsubishi petrol motors and ISUZU diesel engines.

Our electric engine comes from America by GE and has the feature of Stepless Speed Regulation.

The centre console features easy to read high clarity meters and a Digital Display.

The seat and the steering wheel are both fully adjustable for ease and comfort of the driver.

- Italian ZAPI dual controllers
- German ZF drive unit
- Clear LCD instruments
- High-capacity battery
