

SERVICES PROVIDED

Free Estimates	Ready for your call
Consultation & Diagnosis	We have the experience to consult with you and diagnose tree problems
Tree Pruning Levels	<p><u>Crown Cleaning</u> - Removal of diseased, decayed, dying, dead, interfering, objectionable or weak branches.</p> <p><u>Crown Thinning</u> - pruning for air movement, light penetration, (this also allows lawn to grow in the shaded areas around trees), reduced wind sail effect and heavy limbs. (Includes Crown Cleaning as well).</p> <p><u>Crown Raising</u> - Removal of branches from the bottom of the crown to provide clearance for pedestrians, vehicles, building and lines of sight. (Also to allow lawn to grow in the shaded areas around trees).</p> <p><u>View Pruning</u> - Selective thinning to create a specific view of either the tree itself or the landscape behind the tree.</p> <p><u>Crown Restoration</u> - To improve structure of previously topped, vandalized or storm damaged trees.</p> <p><u>Crown Reduction</u> - Reduces the height and/or spread of a tree. Used as a last resort to clear utility lines or when there is significant crown die back or the growth has insufficient strength.</p>
Tree Removals	Large or Small
Fertilization and Root Stimulants	If you have trees that appear to be in poor health, a fertilization program can often help.
Planting Guides	Planting the right tree in the right place will eliminate a lot of potential problems both structural and cost. We can help inform you what trees to plant and how.
Mulch/Chip Sales	Small Chip size (Cost varies \$5 p/m to \$10p/m)
Stump Grinding	Large or Small
24 HOUR EMERGENCY STORM SERVICE	
Safety For Public, Property, and Trees	All work done to Australian Standards

Arborforce recommend [Logan River Tree Farm](#) for advanced screening trees and shrubs.
